

Planes

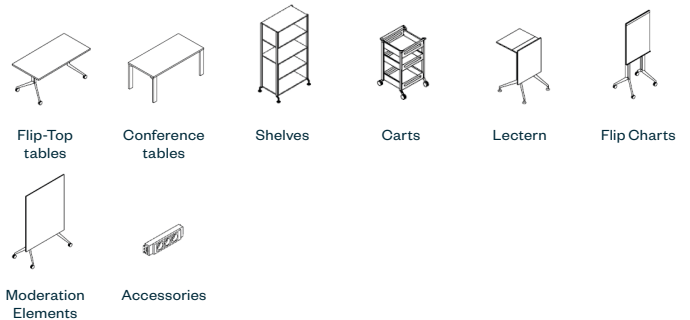

Planes allows big changes. Planes offers the tools for continuously changing work and conferences spaces. New layouts can be created for each situation and spontaneously changed if required.

Features

- Dynamic layout for improved communication
- Honeycomb structure. The light-weight panel combines stability, lightness and versatility
- Quick release leg. The technology of the patented connector allows a stable and durable connection between a lightweight worksurface and a table leg
- Recyclable materials used - Planes bears testimony to our dedication to the environment
- The quick release leg can be used as a table leg or as a „bridge support“ for connecting two tops
- The worksurface of the Flip-Top table can be folded into a vertical position by releasing the locking mechanism
