

Flor series

Designed by Martin Lauritsen

The Flor barstools are designed by Martin Lauritsen and inspired by Scandinavian and Japanese design heritage – crafted with the highest precision in every detail, with sophisticated woodwork in FSC®-certified oak and upholstered in STANDARD 100 by OEKO-TEX® certified fabric or natural, traceable leathers. The slightly angled legs provide a strong and stable seat, making Flor a perfect choice for both home, restaurant and bar environments.

Meet the designer

According to industrial designer Martin Lauritsen, a designer's most important task is to develop durable products. High-quality products that last for generations. In addition to creating value and joy in our everyday lives. "Good design is like good music. Both can create positive moods and emotions through their melodies, rhythm, shape, colour, materials and more. I find the emotional qualities that aesthetics can create very interesting, and this is a driving force in my design process, just as much as creating good functional solutions."
