

Seed series

Designed by Hans Thyge & Co, Denmark

Seed is a versatile series of chairs designed by Hans Thyge & Co. that can be mixed and matched – available as a regular chair and in an outdoor version. The shell is shaped into a poetic form, made entirely from recycled plastics, and designed to embrace you with exceptional comfort and support. In the process of melting and casting would-be waste materials into form, a subtle play of colour is created, making every shell unique. Available in four muted colours and a variety of fabrics and legs, all tested to meet the highest quality standards. The complete collection offers chairs suitable for all settings from the home office and dining room to the professional market and beyond.

Meet the designer

Hans Thyge & Co consists of passionate designers with strong ideas and a love for beautiful design. Together we work with a combination of a strong tradition and a drive to explore the unknown and innovative parts of design. The design studio specializes in designing furniture, objects and interiors. We juggle with everything from technical projects and lifestyle concepts to branding and communication and always with a strategic, sustainable and commercial approach in mind. We have a long history of know-how and experience working with a variety of materials and production methods for clients worldwide. Working with many nationalities and different design approaches worldwide, demands an attitude of openness and collaborative skills. The mixture of different cultures and design-traditions is the hot-spot where great design comes to life. We believe in combining brain and heart, function and aesthetics, and that every design should tell a story; a product is so much more than the product itself, it is about creativity, vision, culture, company values, the past, the present and the future.
